CEZAR PEDROSO

Software Engineer | C# / .NET | ASP.NET Core | React | SQL

Oskaloosa, IA | (641) 931-0461 | cezarapedroso@gmail.com | LinkedIn | GitHub | Portfolio

EXPERIENCE

Application Developer Intern | Homesteaders Life Company, West Des Moines, IA May 2026 – Aug 2026

- Developed backend services and REST APIs using **C# and ASP.NET Core** for a production life insurance claims correspondence platform, automating manual workflows and implementing business logic, CRUD operations, and editable email templates; designed and maintained **SQL Server** models with **Entity Framework Core**, including relationships, migrations, and queries.
- Implemented **OAuth 2.0 and Microsoft Entra ID** authentication, JWT-based authorization, and role-based access control to secure API endpoints and manage user permissions.
- Wrote automated tests using **xUnit and Postman**, investigated production issues, and integrated **Serilog** for structured logging and audit tracking of application changes.

Software Engineer Intern | William Penn University, Oskaloosa, IA Sep 2025 – Present

- **Oskaloosa Police Department:** Built a React and TypeScript citation management system with driver's license barcode scanning to automatically populate citations, integrated third-party geocoding APIs for street addresses, implemented role-based access control, and wrote automated tests using Vitest and Playwright.
- Built a React and TypeScript **web-based academic planning tool used by 30+ William Penn University staff** to forecast course demand and classroom needs from enrollment data, generate degree-map-based student schedule recommendations from coursework or transcripts, and export planning results; implemented automated testing and a **GitHub Actions/Cloudflare Pages CI/CD pipeline**.

Contract Software Engineer | Self-Employed, Remote Jul 2025 – Present

- Delivered custom software and asset-management systems built with **ASP.NET, C#, and React** for **4 mechanical and industrial maintenance companies in Brazil**, owning the full lifecycle from requirements and architecture to testing, cloud deployment, and client support.
- Replaced paper-based workflows with a **barcode-based asset tracking and preventive-maintenance system** for industrial compressors.

SELECTED PROJECTS

DotDet (.DET) | Open-Source .NET Production-Readiness Analysis Platform | dotdet.vercel.app

- Built and deployed a platform that analyzes ASP.NET Core apps for risks in architecture, dependency injection, EF Core migrations, security, and API design.
- Built a React workbench (readiness scoring, code exploration, saved history, JSON/Markdown/HTML exports) secured with GitHub OAuth, server-side token handling, rate limiting, and execution timeouts.

WPU Residence Life Management Portal | GitHub

- Built a **React, TypeScript, ASP.NET Core, and EF Core** application for duty schedules, resident records, room checks, dorm sweeps, incident reports, and PDF downloads, replacing manual forms and reducing duplicate work for staff. **Used by school staff with 25+ active users.**
- Implemented sign-in with **Microsoft Entra ID** and added **role-based access** so staff only see the information and hall data assigned to them.
- Tested scheduling, authentication, and resident-management logic with **xUnit**; deployed updates through **GitHub Actions to Azure Web App**.

SchemaArchitect | .NET Backend Code Generator | schemarchitect.azurewebsites.net

- Built a configurable **.NET code generator** that transforms SQL database schemas into structured **ASP.NET Core** backends, automatically generating entities, DTOs, and data access layers.
- Implemented automated **xUnit** tests and a **GitHub Actions CI/CD pipeline** for deployment to Azure, improving code reliability and streamlining releases.

EDUCATION

William Penn University | B.A. Software Engineering, Minor in IT Expected Dec 2026

GPA: 3.6/4.0 | Dean's List (5×), President's List (1×), Academic Achievement Award

TECHNICAL SKILLS

Languages: C#, TypeScript, SQL
Backend: ASP.NET Core, REST APIs, EF Core, Express, OAuth 2.0 / Entra ID
Frontend & Data: React, SQL Server, PostgreSQL, MySQL
Testing & DevOps: xUnit, Vitest, GitHub Actions, Docker, Azure
