

CEZAR PEDROSO

Application Developer | ASP.NET Core | C# | Blazor | SQL

Oskaloosa, IA | (641) 931-0461 | cezarapedroso@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EXPERIENCE

Software Engineer

Aug 2026 – Present

OskyApp

Oskaloosa, IA

- Lead and mentor a team of five developers building a community web application in partnership with the Mahaska Chamber & Development Group.
- Collaborate with stakeholders to gather requirements, incorporate feedback, and define application features.
- Provide technical direction, coordinate tasks, and support architecture, troubleshooting, testing, and maintainable development practices.
- Help design application structure, data models, and reusable components while coordinating implementation across the development team.

Application Developer Intern

May 2026 – Aug 2026

Homesteaders Life Company

West Des Moines, IA

- Developed a production Claims Correspondence management application, streamlining daily workflows for the Claims Department.
- Developed backend services and REST APIs using ASP.NET Core and C# for an enterprise claims-correspondence platform.
- Designed and maintained Entity Framework Core data models and database schema migrations supporting core claims workflows.
- Refactored shared modules and optimized document-processing methods to improve performance and maintainability.
- Implemented structured logging with Serilog and expanded automated testing using xUnit and Postman to improve reliability and troubleshooting.
- Implemented OAuth 2.0 authentication with Microsoft Entra ID to secure application access.
- Collaborated with stakeholders to gather feedback and implement application enhancements based on business needs.

Software Engineering Intern

Jan 2026 – Apr 2026

VTEX

Remote

- Contributed to the development of a Customer Relationship Management (CRM) system supporting customer data and business workflows.
- Developed and maintained backend services using C#, .NET, ASP.NET Core, and RESTful APIs.
- Designed data models and database access using Entity Framework Core, including LINQ queries, entity relationships, and schema migrations.
- Developed a Blazor frontend with reusable components to support application functionality and maintainability.
- Built and integrated APIs, implemented business logic, and diagnosed and resolved backend defects through testing, code reviews, and collaboration with engineers and stakeholders.

Software Engineer Intern

Sep 2025 – Nov 2025

William Penn University

Oskaloosa, IA

- Designed and developed a full-stack citation-management platform for the City of Oskaloosa using Node.js, PostgreSQL, and Tailwind CSS, replacing a slow existing system.
- Implemented approximately five role-based workflows for city personnel and citizens, including digital citation issuance, online review and disputes, audit logs, analytics, media uploads, and PDF generation.
- Designed the database and backend architecture, implemented authentication and testing, and incorporated stakeholder feedback into the prototype as it moved toward operational use.

Contract Software Engineer

Jul 2025 – Present

Self-Employed

Remote

- Delivered custom web applications and enterprise asset management (EAM) systems for 4 mechanical and industrial maintenance companies in Brazil, including a barcode-based asset tracking and preventive-maintenance alert system for one client's fleet of industrial compressors, replacing manual, paper-based tracking processes.
- Built full-stack solutions using C#, .NET, React, Blazor, SQL, and PostgreSQL, covering equipment inventory, maintenance scheduling, work order tracking, and client-specific reporting features.
- Managed the complete development lifecycle independently, including requirements gathering, architecture, testing, cloud deployment, and ongoing client support.

PROJECTS

[DotDet \(.DET\)](#)

Open-Source .NET Production-Readiness Analysis Platform

- Developed and deployed a web platform that analyzes multi-project ASP.NET Core applications, identifying production-readiness risks across architecture, dependency injection, EF Core migrations, security configuration, and API design.
- Created source-linked findings with severity, confidence, evidence, root-cause grouping, and remediation guidance, and documented calibration work to reduce false positives and improve analysis quality.
- Built a React reporting workbench with readiness scoring, code exploration, saved history, finding dispositions, and JSON, Markdown, and HTML exports.
- Secured repository and upload workflows with GitHub OAuth, server-side token handling, sanitized storage, rate limits, and execution timeouts.
- Validated the platform across 10+ applications and with 10+ users, including professional developers.

[Document Approval System](#)

Enterprise Document Governance Platform

- Developed a full stack document governance platform using ASP.NET Core 9, React, TypeScript, SQL Server, and Microsoft Entra ID, with database backed department and role authorization.
- Implemented a sequential approval workflow, covering submission, review, change requests, approval, and rejection, with ownership and role checks enforced at the API layer.
- Added immutable document versioning, approved version tracking, optimistic concurrency, audit logging, and integration tests for authorization and workflow rules.

TECHNICAL SKILLS

Languages: C#, Python, SQL, JavaScript, TypeScript

Frontend: HTML, CSS, React, Blazor, Tailwind CSS

Backend: ASP.NET Core, REST APIs, Entity Framework Core, Serilog

Databases: SQL Server, PostgreSQL, MySQL

Cloud: Azure DevOps, Azure App Service, Microsoft Entra ID, Git, GitHub

Developer Tools: Visual Studio, VS Code, Postman

EDUCATION

Software Engineering (B.A.), Minor in Information Technology

Expected December 2026

William Penn University

GPA: 3.8 / 4.0

Honors: Dean's List (5x), President's List (1x), Academic Achievement Award (Honors Program)
